Meeting Minutes
PWC ILab Teams Meeting on 22.04.2024, 14:00pm

Agenda:	Close-to-final results and Story-telling interpretation
Participants:	PWC: Christian Koellich, Florian Moemken,
	WU: Florian Pauer, Lukas Handler,
	Students: Arina Suhodolova, Sophie Grill, Alexei Volodin,
	Dinara Zainullina, Sebastian Herzog
Last Meeting:	05.04.24 at 11:30am
Next Meeting:	Online Teams Meeting on 03.05.24 at 11:00am

Presentation of code adjustments and improved visualizations

Team
- Presentation of synthetic indices based on regions and their rolling regression significance results;
- All the results were implemented in Shiny;
- Demonstration of economic interpretation on one time frame using significance results and loadings;

Suggestions and Adjustments to be made

Pauer
- try to plot t-statistic so that the results are not just binary but also shows the dynamics (maybe it adds more value for explaining the results)

Koellich
- add a legend to the significance regression result graphs saying 1 -significant, 0 - not significant;
- Include 1 slide summarising the key steps and why we did this project (significance of it) and how this now can be implemented in the future;

Handler
- add overview/summary - what we have learnt and how can we use this in the future (similar point to what Christian Koellich)
- For the final ppt: what was asked of us, Initial steps, etc. so short overview and then we go into shiny and show all results there. Presentation should be around 30-40 min and then Q&A
